LI LUDOVIC

CREATIVE TECHNOLOGY ENGINEERING STUDENT

COMPUTER VISION · ROBOTICS · HUMAN–COMPUTER INTERACTION
SEEKING A 6-MONTH INTERNSHIP IN AI, ROBOTICS OR INTERACTIVE SYSTEMS

Yvelines, France

ABOUT ME

Master's student in Creative Technology with hands-on experience in computer vision, interactive systems and rapid prototyping. Experienced in developing Python-based AI prototypes and integrating software with hardware using Unity, Arduino and ESP32. Seeking a 6-month internship in AI, robotics or human-computer interaction.

SKILLS

- Programming & AI: Python, C++, C#, SQL, HTML · CNNs, image preprocessing, computer vision
- Hardware & Prototyping: Arduino, ESP32-S3, electronics, 3D modeling, rapid prototyping
- Tools & Frameworks: Unity, MediaPipe, Arduino IDE, KiCad, SolidWorks, Fusion 360, Figma
- Soft skills: Teamwork, creativity, design thinking

EXPERIENCES, PROJECTS

Computer Vision Intern – PQTEL

Apr 2026 – Aug 2026 / Changsha, China

- Developed handwritten-digit recognition with Python, MNIST, CNNs and image preprocessing.
- Built camera-based recognition and a TinySSD multi-digit detection prototype using a custom annotated dataset.
- Developed KeyMotion, an interactive projected piano using MediaPipe, Unity, audio mapping and an ESP32-S3.

Project TeruBot

Sep 2025 – Apr 2026

- Designed an interactive robot connected to a community app. Users share daily emotions, allowing the system to compute a collective mood that informs the robot's behavior and facial expressions.
- Combined Arduino-based hardware, Python eye animations, SolidWorks 3D modeling and application development focused on emotional feedback and social interaction.

Project BreathIN

Sep 2026 – Present

- Developing a peaceful Unity environment where a character's movement is controlled by the user's breathing, captured via microphone or EMG sensor. The project explores human-computer interaction and biofeedback for relaxation.

Python Projects

Sep 2026 – Present

- Developing a Tkinter weather app displaying current conditions, a five-day temperature forecast, and sunrise/sunset times.
- Developing a film-rating and recommendation app using SQL for the database and Swift for the app.

Mathematics Tutor

2022 – Present

- Provide private mathematics tutoring to middle-school students, adapting support to their individual needs.

EDUCATION

ESILV 2022–2024 / Engineering School / Paris La Défense

- Integrated preparatory cycle
- Foundations in mathematics, physics, coding and engineering science

DORSET COLLEGE Jan 2025 – May 2025 / Dublin

- Semester abroad at Dorset College
- Courses taught in English: fluid mechanics, data statistics, data analysis, C++, database & interoperability, complex systems

ESILV 2025–2027 / Major in Creative Technology for IFT

- Hands-on learning, human-computer interaction, computer science, electronics and 3D modeling
- Quickstarter project: creation of a small product intended for launch on Kickstarter

LANGUAGES

- French (native)
- English (TOEFL C1)
- Spanish (A2)
- Chinese (A1)

INTERESTS

- Sports: football, swimming, running
- Music: 10 years of cello
- Cooking
- Travelling
